ABOUT ECOBLUE

EcoBlue is based in the beautiful emirate of Ras Al Khaimah. We are passionate about the ocean and our environment with a strong focus on sustainable tours and education. We have multiple fast and pleasure boats and specialize in boat and yacht chartering within RAK for a wide array of water-based activities. As part of our ongoing commitment to eco-tourism and sustainability we have implemented the following actions carried out by our crew during our daily trips:

WATER QUALITY MONITORING

FISH SPECIATION RECORDING

MARINE MAMMAL SIGHTINGS

RUBBISH REMOVAL

COLLABORATION EQUALS CHANGE

A community working together achieves far more than an individual. EcoBlue offers corporations a unique way to fulfill their CSR and ESG commitments by engaging in real, hands-on marine conservation activities. Your company can actively contribute by sponsoring educational trips, organizing cleanup initiatives, and engaging employees in environmental efforts. In return, we ensure brand visibility, stakeholder engagement, and impact reporting that aligns with your sustainability goals.

Contact us now to discuss further on how we can collaborate.
